

# Squarespace handoff

matchaxmoxie · handoff sheet · Last checked: October 2026

This sheet is meant to be easy to follow. If you are unsure, stop and ask the owner before making changes.  
This is for the next person who needs to edit the live Squarespace site without needing a full tech background.

## Why tickets happen

Mistakes happen when a page is edited in a draft and never saved or published, so the public site stays outdated.

## Steps

- 1 Go to squarespace.com and sign in with the email that owns the site.
- 2 Open the site and click Pages.
- 3 Choose the page you want to edit.
- 4 Click Edit and change the text or pictures.
- 5 When you are done, click Done, then Save.
- 6 If the page is still a draft, click Publish so the public site updates.

## Write this down

- The email that owns the Squarespace login.
- The live site address.
- Who to ask if that email is unknown.
- Never put the password on this sheet.
