

Square handoff

matchaxmoxie

This page is for the person who will use the Square register after someone else set it up.

What handoff means

Handoff means you can sign in, ring a sale, and take a card without the person who set up the register standing there.

Steps

1. Open the Square Point of Sale app on the register and sign in. The owner can also open the account at squareup.com.
2. On the checkout screen, tap the items in the sale. If an item is not on the screen, enter the amount.
3. Tap Charge.
4. The customer taps, inserts, or swipes the card. Wait until the screen shows the payment went through.
5. On the receipt screen, they can enter an email or a phone number. Tap Send. Print if a printer is connected. They can also skip the receipt.

Button names move a little between devices. If a label is not on your screen, stay with the sale, the Pay or Charge button, and the receipt choices.

Write this down

- The email that owns the Square account.
- The location name on the register.
- Who to ask if the app will not sign in.
- Do not write the password on this page.

Video

How to Take Contactless & Chip Payments | Square Reader Setup Tutorial [2023 Version]

Channel: Square

<https://www.youtube.com/watch?v=dhLF27VkNQM>

Square's own beginner video. It shows a sale, Charge, and a tap or chip payment on the reader.

Same steps as the handoff page. No password belongs on this page.
